The SBA B-0 class panel is suitable for all kinds of ships accommodations. The B-0 panel is light weight, strong and the thickness is only 16 mm. The installation is fast and easy.

The panels are made of galvanized steel sheets coated with a decorative PVC foil. The SBA panels are also available with special custom-made printings.

The panel consists of non-combustible materials with a core of mineral wool.

The panel system is supplied with a full range of assembly profiles.

Standard panel dimension (W x H): 600 x up to 3000 mm
