

Weight incl. joint profiles	24,6 kg/m <sup>2</sup>
Steel thickness	0,6 mm
Panel thickness	52 mm
Panel width min./max.	175/600 mm
Panel length max.	3000 mm
Fire rate	B-15
Sound reduction $R_w$ (lab)	45 dB

The 16 mm panel is rated as B-15 when assembled double with an airgap, e.g. cabin-to-cabin. The system is light weight and very strong with excellent sound reduction values. The installation is fast and easy.

The panels are made of galvanized steel sheets coated with a decorative PVC foil. The SBA panels are also available with special custom-made printings.

The panel consists of non-combustible materials with a core of mineral wool.

The panel system is supplied with a full range of assembly profiles.

Standard panel dimension (W x H): 600 x up to 3000 mm

Panels with perforated backside, the foil is to be removed before installation.
