

Weight incl. joint profiles	12,6 kg/m ²
Steel thickness	0,6 mm
Panel thickness	16 mm
Panel width min./max.	175/600 mm
Panel length max.	3000 mm
Fire rate	B-0
Sound reduction Rw (lab)	 31 dB

SBA panel B-0-class is perfect for all kinds of ships accommodations, including wet-unit and cabins. The installation of the system is fast and easy. The panel is lightweight and has a high noise-reduction index.

SBA panels are made of galvanized steel sheets coated with a decorative PVC foil. SBA panels are also available with special custom-made printings.

The panels are made of non-combustible materials with a core of mineral wool and can be assembled on a coaming in wet areas.

JMC 4 31 B-0 is 14 % lighter and 36 % thinner than normal 25 mm panel.

Bend test: The panel is strong enough, no deflection at 135 kg.

Tested according new IMO rules FTP code 2010.
