

Weight (excl. mattress)	38 kg
Width	870 mm
Length	2065 mm
Mattress size (w x l)	800 x 2000 mm
Mattress recommended thickness	120 mm

SBA manufactures and supplies a wide range of high-quality beds for the maritime industry. The basic material of pullman beds is steel: the edges are always painted, but the bed bottom can be either painted, PVC-coated or coated with a decorative print. The range of colors or patterns available offers the interior decorator numerous alternatives to create the right atmosphere.

Standard pullman bed can be used as lower bed as well as upper bed. When it is used as lower bed, storm rail and handle can be excluded. Locking of beds for night and day position is optional. Ladder, mattress and bed linen not included.
